

CHEMISTRY LABORATORY GUIDELINES

1. KNOW THE SAFETY EQUIPMENT

Be familiar with the location and proper operation of the eyewash station and safety shower before starting laboratory work.

2. PREVENT CHEMICAL EXPOSURE

Understand that chemicals can enter the body through inhalation, ingestion, and skin absorption, and always follow proper safety precautions.

3. WEAR PROPER PROTECTIVE GEAR

Wear safety goggles and closed-toe shoes when chemicals are used. Contact lenses and open-toed footwear are not permitted.

4. NO FOOD OR DRINKS

Food and drinks are strictly prohibited inside the laboratory.

5. WASH HANDS THOROUGHLY

Wash your hands and forearms thoroughly after conducting laboratory activities.

6. DISPOSE OF CHEMICALS PROPERLY

Follow the proper chemical disposal procedures. Never dispose of chemicals in unauthorized containers or drains.

7. HANDLE TEST TUBES SAFELY

When holding or heating a test tube, never point it toward yourself or others.

CHEMISTRY LABORATORY GUIDELINES

8. TIE BACK LONG HAIR

Always tie back long hair securely before conducting experiments.

9. KEEP THE WORKSPACE CLEAR

Place backpacks and unnecessary items in designated areas. Keep only the materials needed for the experiment on the worktable.

10. REVIEW THE MSDS

Review the Material Safety Data Sheet (MSDS) before beginning an experiment to understand the hazards, handling, and safety precautions for the chemicals being used.

WHAT TO DO IN CASE OF INCIDENTS?

1. CHEMICALS IN EYES

If chemicals get into the eyes, immediately rinse using the eyewash.

2. CHEMICAL SPILLS ON CLOTHING

If hazardous chemicals spill on a large area of clothing, use the safety shower immediately.

3. CHEMICALS ON SKIN

If chemicals spill on the skin, wash immediately with soap and water, including under rings or watches.

4. CHEMICAL INGESTION

If chemicals may have been ingested through contamination, wash hands and forearms thoroughly before touching the mouth or face.

5. CHEMICAL ODORS

If smelling chemicals is required, waft the chemical and do not inhale deeply.
